

Seabird Monitoring for Hawaii and the Pacific Islands

PIERC Project Leader: Michelle Reynolds, Ph.D.

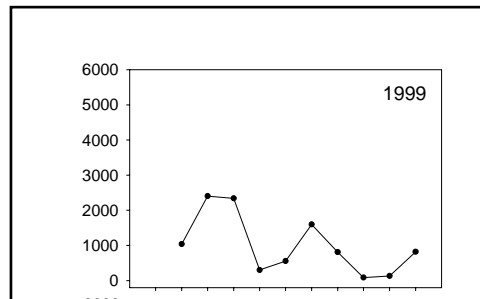

Objectives:

- ☆ Assess existing data and monitoring methods
- ☆ Provide detailed, standardized protocols (13 species) to meet seabird management goals
- ☆ Develop a seabird monitoring plan

Accomplishments:

- ☆ Black Noddy (*Anous minutus*)
 - ☆ Red Footed Booby (*Sula sula*)
- Preliminary data assessments

Significance:

- ☆ Design rigorous methods for the Fish and Wildlife Service to monitor seabird population status and trends on the National Wildlife Refuges of the Pacific Region
